Company Profile

About Us

Ningbo Yinzhou Tianyu Synthetic Materials Co., Ltd.
www.ptfebakehome.com

Ningbo Yinzhou Tianyu Synthetic Materials Co., Ltd. was established in the year of 2013 in Ningbo City, but actually with more than 12 years' experience in this line of products. When it first kicked off, it was a tiny sales office with only two people and without factory site of our own. As business gradually grows, we now have more than 40 working staffs and a BSCI-certified & GMP-certified factory of 8,500 square meters in Anhui province, along with customers across the globe, like United States, EU countries, Thailand, Japan etc.

Despite large supermarkets, importers and brand stores, we have also been working closely with quite a few valuable online retailers from Amazon, eBay, Aliexpress and other independent online retailers. As it's the new trend for modern business, we would hope to extend this part of business.

Currently we have three production lines:

1. Nonstick PTFE Series
2. Nonstick Silicone Series
3. Beeswax Wrap Series

Ningbo Yinzhou Tianyu Synthetic Materials Co., Ltd.
www.ptfebakehome.com

And we are also putting in a lot of efforts to develop new materials and new products and we would like to work with our customers to test ideas of products improvements.

NONSTICK Stove Burner Covers

Our Stove Burner Cover is made of fiberglass and PTFE coating. It can perfectly protect the surface of your gas stove by catching spills and splatters.

Cut to Fit

The dimensions of this cover is 27x27cm. The pre-cut inner ring can be easily cut to fit different types of stoves.

Wipe to Clean

This PTFE Gas Stovetop Burner Cover is nonstick on the surface. It's easy to wipe out stains with merely a piece of damp cloth.

Dishwasher Safe

These Stove Burner Covers are safe to use in a dishwasher for easy cleaning.

- Reusable
- Eco-friendly
- Natural
- Sustainable

Reusable beeswax wraps are an easy and efficient alternative to plastic wrap. This product is typically made of cotton or another type of breathable cloth and boasts an organic beeswax coating.

The warmth and pressure from your hands molds the wrap to fit the container of your choice. These wrappers can be washed after use and can typically be reused over a hundred times before they need to be replaced.

TY-PM-100A

TY-PM-100B

Benefits of Nonstick Perforated Oven Mat

1. Perforated Silicone baking mat is made of silicone coated fiberglass mesh with special holes on the mat. Perforated design makes pastry/pizza/bread more evenly heated.

2. As dough contains about 60-80% of water, when you bake with this mat, water would seep out from the holes and leave a crisp finishing quality for the baked food.
